

Anytime, Anywhere Image Management and Reporting

ULTRALINQ[™]
HEALTHCARE SOLUTIONS

A Workflow That Works for You

UltraLinq is an easy to use, web-based ultrasound exam management system that allows exams to be seamlessly uploaded. Once uploaded they can be reviewed, reported, archived and distributed utilizing our intuitive web portal, from anywhere with internet access.

Save Time

After an exam has been completed and digitally signed by a physician, reports can be automatically distributed via fax, email, or transferred through HL7. Exams and reports are also archived for the HIPAA compliant period for easy exam recall and previous exam comparison.

Eliminate Redundancy

As exams upload UltraLinq receives all of the images, clips and structured reporting files, auto populating all of your patient demographics and measurements into preliminary reports. Simple workflow rules mean that interpreting physicians can immediately review and finalize on the exams.

Make Accreditation Easy

Centralized exam management ensures that exams are easily accessed and exported for a simplified accreditation process. If you are already accredited, UltraLinq's anywhere, anytime exam availability will ensure that Q/A can be completed in minutes.
